

**Reflection
Concrete
Tanks™**

Keeping it clean. Pure and simple.

The team at Reflection Concrete Tanks has 30 years experience is producing solid pour concrete tanks. Originally formed to allow inhouse production of the concrete tanks used by Reflection Treatment Systems, Reflection Concrete Tanks has been producing 300 plus tanks a year. With the ongoing success of Reflection Concrete Tanks and experience we can provide, we have started to produce 25,000 litre solid pour concrete water tanks. These tanks can be used for....

Scope. Design. Install. Maintain.

Since 1995, we've gained a reputation as a provider of quality service and integrity, leading to Reflection Wastewater Treatment Solutions becoming the trusted partner on numerous large-scale projects in the public and commercial sector.

15-Year Warranty Peace of mind with a long-lasting guarantee.

Built to Last. Designed for Performance.

Perfect for a Range of Installations

Ideal for use with 300mm soil cover and small vehicle loads up to 2500kg, or installations with 300mm to 800mm soil cover—no vehicle surcharge required.

Fully buried with only the manhole riser and lid visible.

Commercial and Residential size tanks available.

Why Choose a RCT Tank?

• Premium Strength Construction

Made from high-performance 70 MPa Durability Enhanced Concrete for exceptional longevity and resilience.

• Superior Reinforcement

Reinforced with centrally placed galvanised welded mesh—no steel fibres or rust-prone mesh used.

• Fully Sealed, Factory-Bonded Roofs

Tank roofs are securely sealed during manufacturing, ensuring zero onsite sealants are needed. This keeps your water safe from contamination and reduces installation time.

• Integrated Inlets, Outlets & Overflows

PVC components are precision cast into the tank—strategically placed for easy connection. This eliminates the need for cold sealing or power tools onsite, making installation fast and efficient.

• Secure, Child-Safe Manhole Lids

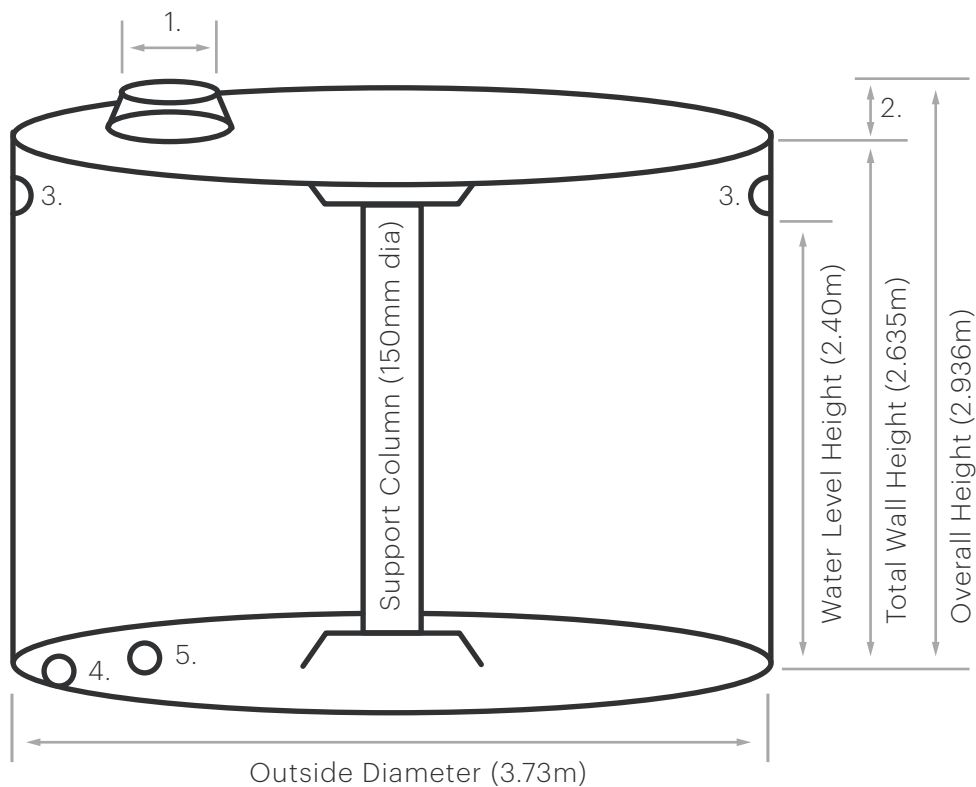

All manhole covers are bolted down with stainless steel fasteners to enhance safety and prevent tampering.

Spec Sheet

Contact us to discuss how a Reflection Concrete Tank can work in your space.

1. Hatch Opening (550mm)
Manhole lid max. load capacity (500kg)
2. Permitted ground cover
3. Overflow / inlet (4 positions)
4. Drain
5. Outlet

All measurements are subject to manufacturing tolerances.
